

NEXUS

5-20X50 FFP

The word “NEXUS” means “focal point”, and that is what this model is to the ELEMENT OPTICS range.

The Nexus combines intuitive features like tool-free tactical turrets, zero stop and a removable throw lever with precision engineering to bring you the ultimate 30mm riflescope. A variety of different reticle designs in both MOA and MRAD cater to all shooters: Simplified options are easy on the eye, while more complex designs allow experienced shooters to hold off with precision.

Our design team of global competition winners & hunters understands optics, and have introduced strict quality control measures to ensure perfect operation under testing conditions. There's a reason for the price tag: We've held nothing back, selecting only the very best materials, engineering teams, assembly procedures and technical inspections - and you'll realise that the moment you pick it up. Need something that ticks all the boxes? Look no further than our flagship, the NEXUS.

SPECS

MAGNIFICATION RANGE	5-20x	
TUBE DIAMETER	30mm
